In-Line Spark Trap

**In Stock and
Ready to Ship**

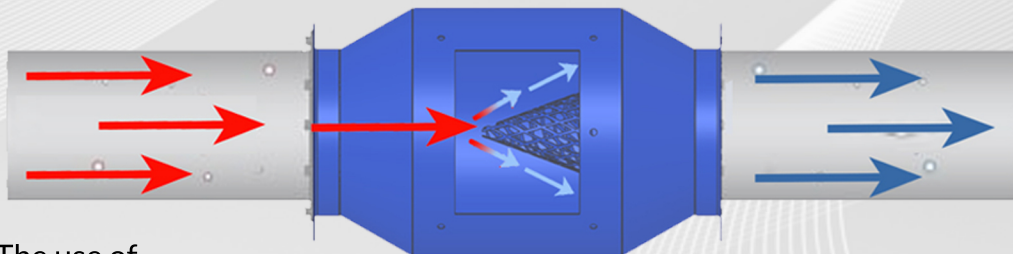

For use with
Laser Cutting
Plasma Cutting
Grinding
Deburring
Cutting
Welding Machinery

Fabricated to fit any round diameter duct, the Spark trap is customized with options of raw, flanged end or quick flange connections for hassle free install.

The spark trap is designed to remove sparks in the dirty air stream prior to entering the dust collector. The use of spark trap will help minimize the risk of a fire in your dust collector in applications where sparks are present.

This spark trap reduces the potential for a fire in your dust collector by capturing sparks before they enter your dust collector. These in-line spark traps are mounted in-line in your duct work prior to your dust collector. It comes with a hinged, clean out access door for easy access to clean out dust and debris that will collect over time.
